Erection of balance of poles & rafters

Purlins, girts, roofing & siding

Note:
This barn may be built in any length desired in units of 12'-0".

Note:
This building is designed for areas of the southern United States where the snow load does not exceed 10" per sq. ft. It is not to be used in areas where snow loads exceed 10" per sq. ft. 2" x 10" rafters should be used instead of the 2" x 8" rafters shown & purlins should be spaced 16" on center. Increase number of 20d nails in rafter to pole connections 50%. It should not be used in other areas without reconsidering framing to meet local conditions.
